

Jock Conyngham is a Research Ecologist in the Environmental Laboratory of the Engineer Research and Development Center (ERDC), US Army Corps of Engineers. He received his bachelor's degree in anthropology and environmental studies from Dartmouth College and a Master in Forest Science and a Master of Philosophy from Yale University's Department of Anthropology and School of Forestry and Environmental Studies. His specialties include multi-scaled assessment, restoration, and monitoring of watersheds, streams and rivers, riparian zones, and aquatic populations. Jock has provided technical support for dam removals, fish passage projects, and restoration initiatives across North America. He has been Principal Investigator on a program to build dam removal expertise in the Corps and its partners through the Ecosystem Management and Restoration Research Program. Prior to joining ERDC in 2002, Jock was Director of Watershed Assessment and Geomorphic Restoration for the national office of Trout Unlimited, where he worked for nine years. He is based in Missoula, Montana.
