Dr. Fischenich is the ERDC EL Technical Leader for Ecosystem Restoration. As a senior researcher, he leads teams of engineers and scientists in the development of criteria, tools, and methodologies for aquatic ecosystem restoration and management. He has published over 350 journal papers, reports, and conference papers related to ecosystem restoration, river engineering, geomorphology, ecohydrology, aquatic habitat enhancement, and environmental benefits analysis. Dr. Fischenich's experience includes 22 years in his present position, as well as 7 years in the Omaha District of the Corps of Engineers and 3 years with South Dakota Department of Game, Fish and Parks working on water resource projects involving ecological objectives. Over his career, he has worked in all 50 states and several countries and his projects have garnered national and international recognition and award. Dr. Fischenich earned his BS and MS in Civil and Environmental Engineering, respectively, at South Dakota School of Mines and Technology, and was awarded a PhD in Environmental Hydraulics at Colorado State University.
