---

Bobby McComas is a research chemical engineer with the US Army Corps of Engineers (USACE) Engineering Research & Development Center (ERDC). He has been with ERDC since 2009 and has been a federal employee since 2011. Bobby's work focuses on sediment capping and ecosystem restoration. He is currently working on several contaminated sediment capping projects and work units that focus on coastal resilience. Bobby is working with senior engineers to better understand the effect climate change will have on our coastal ecosystems.

Bobby was born and raised in Vicksburg, MS. He enjoys spending time outdoors with his wife and 2 year old daughter.

#### EDUCATION

---

M.S. 2014. Chemical Engineering, Mississippi State University  
B.S. 2006. Chemical Engineering, Mississippi State University.
