

Dr. Tomma Barnes is a Lead Planner for the USACE Wilmington District, with a background in Oceanography and Coastal Ecology. Her current and past projects focus on coastal ecosystem restoration in North Carolina and southern Louisiana. Tomma has been a USACE lead on adaptive management for coastal Louisiana ecosystem restoration projects. She also participated in a National USACE Project Delivery Team for Adaptive Management. Her other duties include the account manager for the NW Division for the ECO PCX and a team member on multiple ERDC projects. Prior to coming to the USACE, Tomma was employed by the South Florida Water Management District where she worked on both restoration projects and program adaptive management for the Comprehensive Everglades Ecosystem Restoration Project.
