Work:

Prior to working for the Corps, I taught high school chemistry, physics and math in Minnesota and worked for Westinghouse Electric in Anchorage, Alaska. I worked at the Alaska District for 16 years (1994-2010) as a chemist, industrial hygienist and biologist/Regional Technical Specialist (RTS), at the Memphis District for 2 years (2010-2012) as a Senior Planner/RTS and at the Charleston District as the Planning and Environmental Branch Chief since October 2012. I completed the Planning Associates program in 2008.

Over my career, I have worked on many Civil Works studies and construction projects throughout the country including numerous small boat harbors, deep draft navigation studies, watershed studies, and ecosystem restoration studies. The Charleston District is currently on the leading edge of the SMART Planning Initiative with its Charleston Harbor Post 45 Study. Over my career I have had a unique opportunity to work on a tremendously wide range of projects and partnered with variety of non-Federal sponsors.

Outside Hobbies/ Interests:

I enjoy a wide variety of outdoor activities. In particular, I like camping, fishing, hunting, hiking, skiing and boating with my kids. I also like to do my own home repair, maintenance and renovation projects and am active in scouting, my community and kids' sports.
