

Byron D. Williams, PMP
Deputy Chief of Project Management
Galveston District, U.S. Army Corps of Engineers

Byron Williams has served as the Deputy Chief of Project Management in the US Army Corps of Engineers Galveston District since June of 2015. His background consists of extensive experience within Corps of Engineers ranging from QA/QC Field Engineer, Planning Lead, Continuing Authorities Program Manager, Senior Project Manager to his current position. During his tenure as PM, he was responsible for construction completion of several projects relating to navigation, estuary, and ecosystem restoration. His feasibility management included all projects sponsored with the 2nd Largest Port in the United States, the Port of Houston, and the completion of three Chief's Reports; the largest being a 1.2 Billion Dollar effort on the Sabine Neches Waterway. His current duties include the efficient and effective coordination and accomplishment of the planning, scope, development, design, construction, and direction of all major projects within the assigned Programs in Galveston's Programs Civil Works and International and Interagency Support.

Byron is a Native of Baton Rouge, LA who received a Bachelor of Science in Civil Engineering from Southern University in 1995. His career path led him through planning and project management to his current position. He is a Certified Project Management Professional and a strong believer in the service the Corps provides to the Nation. Byron is also a small college and Texas High School Basketball referee. He enjoys most sports, but is most passionate about New Orleans Saints and LSU Football. He has two kids in 7th and 11th grade and spends most days at home catching up on recorded shows with his wife.
